PPI Group welcomes the opportunity to provide comment on WELS review

The Plumbing Products Industry Group Inc (PPI Group) welcomes the opportunity to provide comment on the independent review of the Water Efficiency Labelling and Standards (WELS) Scheme discussion paper.

In particular to place our view on the record regarding the design, effectiveness and efficiency (including cost) of the WELS Scheme provided by the third review of the WELS Act 2005, being undertaken by Allen & Clarke.

FURTHER INFORMATION

Update on Lead in Drinking Water

A copy of PPI Group's submission regarding the Lead in Plumbing Products in contact with Drinking Water Consultation Regulation Impact Statement 2020 (CRIS) is available in the members area on the PPI Group website under the heading 'PPI Group Submissions'.

LOGIN TO MEMBERS AREA

PPI Group's next General Meeting is scheduled for 14 April 2021

PPI Group's first General Meeting for 2021 will be held on 14 April 2021 at the offices of Standards Australia in Sydney, commencing at 1.30pm AEST. A copy of the agenda is available in the members area of the PPI Group website. Register your attendance by contacting Mr Stuart Henry.

CDC Report: Cost of infectious waterborne disease in the US

The CDC has released a new analysis of waterborne disease in the United States following a comprehensive 10-year study. The report, *Estimate of Burden and Direct Healthcare Cost of Infectious Waterborne Disease in the United States*, found that about 7.15 million waterborne illnesses occur annually, leading to more than 6000 deaths.

Introducing PPI Group's new Special Interest Group (SIG): Cabs and Labs

The PPI Group Board of Management is very pleased to announce that a new Special Interest Group: Cabs and Labs has been established. This means extra value for PPI Group Members in the form of getting an understanding of what the Cabs and Labs positions are, in terms of i.e. the WaterMark transfer issues and know how to manage processes with laboratories where there are technical issues.

ID TechEx: water sensor market will be worth over \$2bn by 2030

Many water and wastewater networks are currently not digitised, using analogue or slow systems to collect samples, analyse data and provide data for companies to use. These results are used to meet pollution requirements, policy limits and to ensure that the treatment of both water and wastewater plants are running correctly.
